Export multi format: fbx obj

Some high resolution preview jpg

Wireframe is necessary
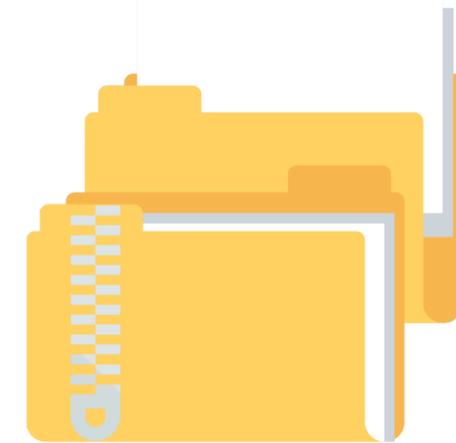

Tell the buyer what is included in the downloadable file

Video Preview is a smart choice

Samples
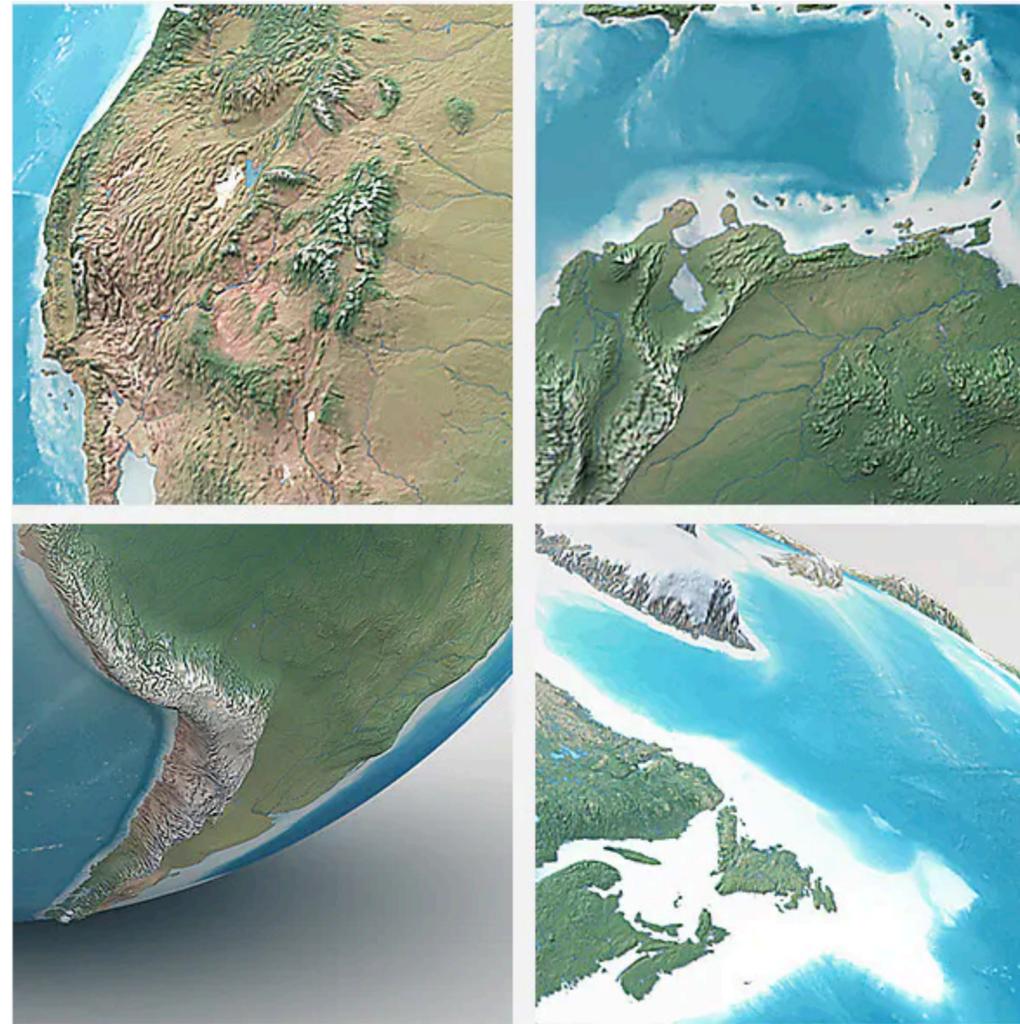

3D World - Earth Globe Model
premade renders included

Included, a .psd file with a **premade scenery and premade renders:** the bottom shadow, the background, and some clouds isolated on separate Layers.
You can simply render your scene (the World) in .png format and place it into the .psd scenery, to have the same results you see in the samples.
You can animate and rotate the 3D World with your favoutite 3D software, exporting it for a video: all the major 3D file formats are included, and the textures allows close-ups.

This Item includes:

- the 3D World Globe is included in **.c4d**, **.3ds**, **.fbx**, **.obj** formats
- **1 .psd** file with some premade renders and a ready-to-use scene

Polycount: 180000 - Total File Size: 134 MB
